

The DNA Relationship Performance Solution

"Know, Engage and Grow" your clients, customers and employees to provide them with customized life long experiences for building sustainable performance. Our purpose is to help people *Live with Meaning™*.

The DNA Relationship System is a turnkey online system for matching clients and customers to employees and solutions from phone call to service delivery.

Our unique approach starts with understanding the unique communication style and preferences of your clients and customers using our proprietary Communication DNA Discovery Process and matching them to employees and solutions offered.

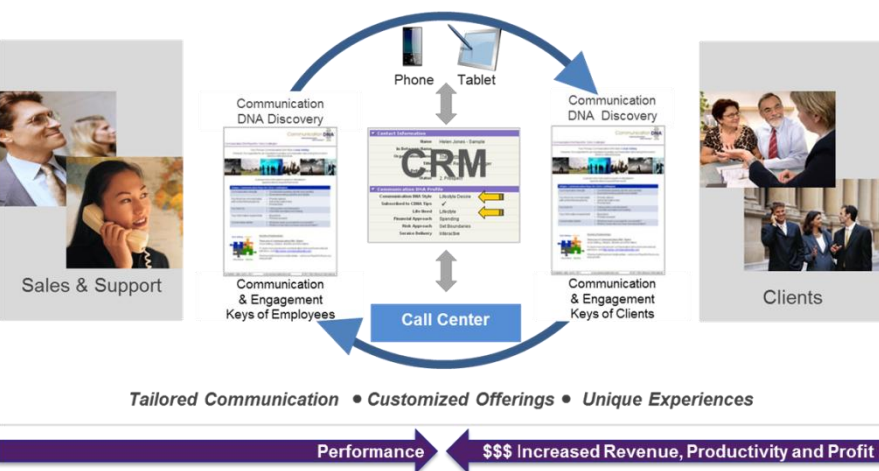

By using the DNA Relationship System, build stronger relationships and start providing customized life long experiences to address challenges such as:

- Losing apparently satisfied clients unexpectedly
- Providing an engaging process at all levels of interaction to create sustainable relationships
- Personalizing an impersonal service
- Acquiring and retaining loyal clients
- Long lead times for clients to commit to services
- Understanding the communication preferences and needs of clients and adapting to the clients style
- Structuring client service programs through which clients feel understood
- Enhancing the ability to cross sell
- Providing unique client experiences in a cost effective manner
- Matching employees/advisors to clients and solutions
- Improving client segmentation to manage information and service flows
